About Me

Third-year IT student focused on data analytics and machine learning, building end-to-end ML pipelines and predictive models with Python, Pandas, Scikit-learn, and SQL. Recently engineered a skill-matching algorithm that cut job-fit calculation latency by 30% and improved resume-to-job relevance scores for 50+ testers, deployed full-stack with FastAPI & React. Stanford-certified in Supervised Machine Learning (DeepLearning.AI Coursera)

Skills

- **Programming & Data Science:** Python, NumPy, Pandas, Matplotlib, Scikit-learn, Jupyter Notebook
- **Machine Learning:** Data Preprocessing, Feature Engineering, Statistical Analysis, Gradient Descent, Model Evaluation
- **Development & Tools:** FastAPI, SQL, React, JavaScript, HTML/CSS, Linux, Git/GitHub

Technical Projects

[Skiller: AI-Powered Career & Resume Platform](#) (Python, FastAPI, SQL, React, TypeScript, Pandas, Scikit-learn)

- Architected an AI-driven resume analysis platform that identifies skill gaps and benchmarks user profiles against live job listings via integrated APIs.
- Reduced job-fit calculation latency by 30% by engineering a custom skill-matching algorithm, improving resume-to-job relevance scores for 50+ active testers.
- Built a full-stack data pipeline to ingest, clean, and serve real-time job market data to the frontend

[AI-Driven Hyper-Local Business Advisor & Financial Structuring Assistant](#) (Python, FastAPI, React.js, JavaScript, PostgreSQL/Firebase, Machine Learning, REST APIs) — 2026

- Designed an AI-powered business advisory platform that analyzes local demand, market gaps, competition, pricing, and business risks to validate ideas for rural micro-entrepreneurs.
- Architected a data-to-recommendation pipeline integrating voice-first input, AI/ML analytics, SWOT and threat analysis, competitor mapping, financial structuring, loan/scheme matching, and personalized recommendations.

Work Experience

- Computer Science Tutor | Private & Local Coaching, Mirzapur, UP 2026
- Mentored students in Python programming, problem-solving, and programming fundamentals through one-on-one and group instruction.
- Designed coding exercises and mini-projects to strengthen logical thinking, debugging, and practical programming skills.

Education

Bachelor of Technology(pre-final year)- Information Technology | Expected 2028

Samrat Ashok Rajkiya Engineering College, Mirzapur,UP

Achievements & Leadership

- Selected among the Top 10 teams at the college level for Smart India Hackathon (SIH) 2026 as a member of Team Code Titans.
- Selected at the college level among 40 participating teams in SIH 2025 for technical innovation and problem-solving.

Certification

[Supervised Machine Learning](#) — DeepLearning.AI & Stanford University (Coursera), June 2026.

Languages

- English, Hindi
